

TECHNICAL DATASHEET

Absolute Motor Feedback Encoder AD36

- For brushless servo motors
- Resolver size 15 mounting compatible
- Through hollow shaft 8 mm
- Resolution: up to 22 Bit ST + 12 Bit MT
- Wide operating temperature range (-40°C ... +120°C)
- 10,000 rpm continuous operation
- Gear based multiturn
- Interfaces: SSI, BiSS-B or BiSS-C
- Sinewave 1 Vpp
- 500kHz Bandwidth
- Special version, suitable for Vacuum on request

GENERAL

The AD 36 is an optical absolute encoder with multiturn gear and optical scanning in Size 36 mm. Unique in its class, it offers a through hollow shaft of 8 mm. This allows a resolver compatible mounting. The mechanical concept is based on a double ball bearing mounted shaft assembly with flexible torque support. The AD 36 complements the ACURO-DRIVE family and is suitable for installation in BLDC servo motors small axle heights.

Completely digital control loop

The novel, completely digital technology enables the transition to a real digital drive system. While the well-known conventional absolute encoders for motor feedback still using analog sine signals for the feedback of motor speed and position, the AD 36 provides fully digital position data with a resolution of up to 22Bit (singleturn) and 12 Bit (multiturn) via a bidirectional synchronous interface with a variable clock rate up to 10 MHz. This corresponds to a singleturn resolution of more than half a million measuring steps. Backwards compatibility is guaranteed via the SSI interface in connection with 2048 sine - cosine periods per revolution.

Diagnostic system integrated

The AD 36 is based on an OptoAsic of the well proven technology, with diagnostic concept. The internal signal processing is controlled by a single step test. subjected to a plausibility check for each individual increment. A code-check ensures that the encoder signal reflects the detected rotation bit by bit. Even the operating temperature of the encoder can be measured with 8 bit resolution (1°C), read and monitored via warning or alarm bit. For a maximum service life of the LED, it is operated in a controlled manner and simultaneously monitored. Possible faults are announced early by warning bit.

TECHNICAL DATA  
mechanical

Housing Diameter	37.5 mm
Shaft diameter	8 mm (through hollow shaft) 8 mm (hub shaft) 6 mm (hub shaft) 8 mm (tapered solid shaft 1:3)
Flange types (housing mounting)	Tether
Protection class shaft input (EN 60529)	IP40
Protection class housing (EN 60529)	IP40
Permissible axial endplay of mounting shaft (hollow / hub shaft)	± 0.5 mm
Permissible radial runout of mating shaft (hollow / hub shaft)	± 0.05 mm

<sup>1)</sup> The encoder is designed to be connected to a SELV power supply. A connection to a DC voltage network is only permitted with the appropriate protective circuit. A corresponding EMC protective circuit is generally required for cable lengths > 30 m .

<sup>2)</sup> With a 5V supply there is no reverse polarity protection

<sup>3)</sup> The cable outlet does not represent strain relief, the cable must be permanently installed near the encoder.

<sup>4)</sup> With connection „0“ and „2“ Interfaces always including SinCos 1Vpp

#### ORDERING CODE cable

The variants with cable outlet (connection A, B) are available with different cable lengths. To get your desired cable length, please put the appropriate code at the end of the order key. Other lengths or plugs at the end of the cable on request

Code	Cable length
Without Code	0,5 m
-B5	1,5 m
-D0	3 m
-F0	5 m
-K0	10 m
-P0	15 m
-U0	20 m
-V0	25 m

Example:  
Cable with 3 m length: ... B - D0

Article	Part Nr.
SSI / BiSS-B Manual	2 565 123
BiSS-C Application Note	2 547 138
cable-Clip axial for cable (Ø 4,8 mm)	E2 541 039
cable-Clip tangential for cable (Ø 4,8 mm)	E2 541 034
Screen clamp for screened cable	1 541 066

In standard encoders, the cable shield is isolated in the cable clip.  
 In EMC-sensitive environments, the cable shield can be attached to the encoder housing using the shield clamp. To do this, the cable shield must be uncovered, folded back over the sheath and fastened in the clamp.
